Maven
Name: maven3.6 (can be any string)
MAVEN_HOME: /path/to/mavenhome (/opt/maven)
```

Git Configuration in Jenkins console

```
Manage Jenkins --> Global Tool Configuration --> Git --> Add Git
Name: git (can be any string)
MAVEN_HOME: /path/to/mavenhome (/usr/bin/git)
```

=====

Install Plugins required for CI Pipeline

Manage Jenkins --> manage plugins -- Available -- search & install the below

```
maven -- install without restart
Warning NG -- install without restart
#cobertura -- install without restart
jacoco -- install without restart
Build Pipeline Plugin -- install without restart
```

=====

Jenkins (CI)

CI (continuous Integration)

Jenkins Job	: maven goal	: post build action
job1-compile	: compile	: NA
job2-codereview	: -P metrics pmd:pmd	: **/pmd.xml (record compiler warnings & static analysis results) (tool=> PMD)
job3-unittest	: test	: target/surefire-reports/*.xml
(Publish Junit test results)		
job4-codecoverage	: verify	: **/**/*.exec (Record JaCoCo coverage report)

```
job5-package      : package                : NA
job6-deploy       : NA                    : NA we use execute shell and scp
command to deploy
```

```
### cobert ura doesn't work with JAVA 11, if using java8 we can use below
to perform codecoverage using cobertura
```

```
### job4-codecoverage : cobertura:cobertura -Dcobertura.report.format=xml
: target/site/cobertura/coverage.xml ( publish cobertura coverage report
)
```
