

Tomcat default administrator password

By default, Tomcat has disabled the login user to manager web application.

To activate the user login you need to edit the **\$TOMCAT_HOME/conf/tomcat-users.xml** file.

```
<?xml version='1.0' encoding='utf-8'?>

<tomcat-user>

<!--

    <role rolename="tomcat"/>

    <role rolename="role1"/>

    <user username="tomcat" password="tomcat" roles="tomcat"/>

    <user username="both" password="tomcat" roles="tomcat,role1"/>

    <user username="role1" password="tomcat" roles="role1"/>

-->

    <role rolename="manager-gui"/>

    <user username="admin" password="strongpassword" roles="manager-gui"/>

</tomcat-users>
```

Note: It is highly recommended not to use the default users from the commented section.

This setting will work from tomcat 7 and up.

```

<?xml version='1.0' encoding='utf-8'?>

<tomcat-users>

    <role rolename="manager-gui"/>

    <role rolename="manager-script"/>

    <role rolename="manager-jmx"/>

    <role rolename="manager-status"/>

    <user username="tomcat" password="password"
roles="manager-gui,manager-script,manager-jmx,manager-status"/>

</tomcat-users>

```

webapps/manager/META-INF comment line Valve className like following

```

<Context antiResourceLocking="false" privileged="true" >

<!--

    <Valve className="org.apache.catalina.valves.RemoteAddrValve"

        allow="127\.\d+\.\d+\.\d+|::1|0:0:0:0:0:0:0:1" />

-->

    <Manager
sessionAttributeValueClassNameFilter="java\.lang\.(?:Boolean|Integer|Long|N
umber|String)|org\.apache\.catalina\.filters\.CsrfPreventionFilter\$LruCache(?:
\$1)?|java\.util\.(?:Linked)?HashMap"/>

</Context>

```
